About Relay Therapeutics

Relay Therapeutics is committed to discovering and developing medicines that will make a transformative difference for patients by building the first dedicated drug discovery pipeline centered on protein motion. Bringing together the latest scientific advances in structural biology, biophysics, computation, chemistry and biology, Relay's drug discovery engine illuminates the full mobility of a protein and the ways in which protein motion regulates function. By applying this approach and by focusing on disease-causing targets, Relay aims to develop breakthrough medicines for patients in need. The company's initial programs are focused on developing therapeutics in oncology. Headquartered in Cambridge, Massachusetts, Relay Therapeutics is a private company launched in 2016 and has received funding from leading blue-chip biotechnology investors, including Third Rock Ventures, BVF Partners, GV, Casdin Capital, EcoR1 Capital, Section 32, Alexandria Venture Investments, and an affiliate of D. E. Shaw Research.
